

Interview Questions

|| Ronak Lamba - NIT Hamirpur ||

Q1) What are your strengths and weaknesses?

Ans 1) My best skill would be my verbal ability and articulation skill. I have participated in multiple case study competitions and with the help of my team, won them. As a marketing head of the coding club of my college, I worked on making sponsorship proposals and public relations. Therefore, my public speaking and research skills have always helped me in every task that I have done. My weakness is that I always end up having so many tasks in my hand. I always say ‘Yes’ to new projects but am not able to commit time to all of them. Therefore, I need to work on saying ‘NO’ to people and I am working on it.

Q2) Where do you see yourself in the next five years?

Ans 2) As a fresher, the next five years will be a huge learning curve for me. During this span, I want to absorb the industry knowledge and work on new projects. I see myself in various roles, from being an analyst to leading a team. And since I have worked with some government organizations in the past as well, working as a consultant on those projects that deal with government policies will be like a dream come true for me.

Q3) What was the most challenging situation and how did you handle it?

Ans 3) I knew that it would be very difficult for my father to pay my college fee. I could have released his pressure by becoming eligible for the scholarship but since I was involved in so many college clubs, I couldn’t qualify due to less CGPA. Therefore, I started working as a content writer at multiple firms. I used to write blogs after 9-5 classes and started earning 30,000 per month. I managed my academics and internships even during the exams also. So, in this way, I managed to pay my college fee.

Q4) Why should we hire you?

Ans 4) My experience in research, content, marketing and public speaking makes me a good fit for this role. I have worked with startups and therefore know about the corporate working culture. It will be easy for me to adapt to the environment and easily learn new technologies. I am a strong team player and a good leader. I have been leading teams for technical and cultural activities during my college days. In your company I will be a great player within any challenging team and provide leadership when opportunity arises.

Q5) Are you willing to change your role and profile when required for a project?

Ans 5) Yes, most definitely sir. As a fresher, I hope and wish to learn as many things as possible. I believe taking up different roles and profiles only helps me learn and grow in this industry.

14 Parameters for Judging the PI

- 1) Communication Skills**
- 2) Skill Set Relevance**
